

SP-2210MJ-ASN(单针)/ADN(双针)

自动缝门襟线专用机
Automatic j-stitch machine

性能优势

用于服装行业的牛仔裤、休闲裤、工作服的门襟J字平行线迹以及非平行线迹的缝制，采用专用的图案编辑软件设定J型线迹花样。

效率

自动化生产工艺，9秒/件
门襟、套结一人独立完成
双针款设备满足双色面线的缝纫需求，生产效率提升40%，节约3人。

适用范围

用于车缝西裤、休闲裤、打缆、牛仔裤等工序,使用范围广泛。

Advantages

For making parallel and non-parallel J-stitching line on jeans, casual pants ,uniforms,etc.T he J stitch pattern can be programmed by specific programming which can meet the needs for different trousers.

Efficiency

Automatic production 9seconds/pcs
J stitch and bar-tacking, can be done by one worker
This machine can use two-color stitching .The productivity efficiency is increased by 40%. It saved 3 workers.

Application

Trousers , casual pants , quilting ,jeans.
