

## SP-3578-JF(锁式) SP-380-JF(链式) SP-380-JF/Z(自动上料)

自动卷袋口机

Automatic pocket hemming machine

SP-3578-JF (锁式 / Lock stitch)  
 SP-380-JF (链式 / Chain stitch)  
 SP-380-JF/Z (自动上料 / Auto loading)

### 性能优势

应用于袋口自动卷边缝，采用全新的机械设计概念，机械应用更灵活，折边装置可适用车缝各种厚薄面料及不同尺寸的袋口，无需任何调整，可调节试拉筒无需按布料厚度特意定制相应的拉筒；  
 送布入料，车缝及出料均采用同一条气动传送带同步传送，保持了缝口不会被拉长或成弓型，缝口整齐划一，提高产品质量，可调节式的拉筒适用于各种款式需求；  
 双针链缝袋口长度可由控制板直接调节，可根据需要更换针位；  
 自动收料，收料后储存在传送带中，无需人工再次整理缝料。

### SP-380-JF/Z

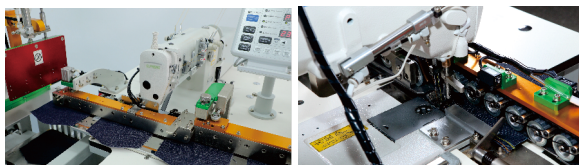

标配自动上料机构，全程自动化操作，无需人工手动上料，两个上料框分别可装250片袋片(牛仔)，自动检测料片情况，自动切换料框，一人可同时操作两台机器，操作员只需在料框内填料及收料等工作，效率提升。

### 效率

完成一片袋口车缝3-4秒/片

### 适用范围

适用于各种厚薄布料及不同尺寸的袋口车缝，无需任何调整，卷折、车缝，收料一次性完成。

### Advantages

This machine used for back pocket auto hemming ,all new mechanical design ,the folding device can apply for all kinds of fabric thickness and different size of pocket without any adjustment .the folder size also adjustable  
 Feeding and stitching by a pneumatic conveyor belt to make sure seams will not be elongated or arched.  
 Chain Stitching length is adjustable by control panel . gauge also removable.  
 Automatic detect material status: the received sewing materials are stored in the conveyor, no need for manual sorting.

### SP-380-JF/Z

Automatic back pocket loading device , there are two loading box can load 250 pcs pocket each .automatic detect material status ,2 box auto switch ,one operator can use 2 machines by refill the fabric and collect the fabric only.

### Efficiency

Finish one piece of pocket hemming in 3-4 seconds

### Application

Applicable to the back pocket hemming by different fabric thickness or sizes, no special adjustment required. folding, sewing and collecting are completed at once.
